

Epiblast

The image shows a scatter plot of numerous circular data points arranged in a fish-like shape. The points are color-coded with a gradient: the leftmost part (the 'head') is dark blue and green, transitioning through yellow and light orange to a dark orange/red at the rightmost part (the 'tail'). The word 'Epiblast' is written in bold black text with a white outline on the left side of the 'head'. The letters 'NE' are written in bold black text with a white outline on the right side of the 'tail'. There are a few distinct dark red points within the orange/red region.
