

**Epiblast**

This figure is a scatter plot visualization of data points. The points are arranged in a horizontal, elongated cloud. The color of the points transitions from dark purple/black on the left to bright yellow on the right, indicating a continuous variable. The label 'Epiblast' is positioned on the left side, and 'NE' is on the right side. Below the main cluster, there are two isolated points: one dark blue/black and one red.

**NE**
