

Epiblast

The image displays a spatial distribution of data points represented by semi-transparent circles. The points are arranged in a horizontal, elongated cloud. A color gradient is applied across the cloud, transitioning from green on the left to yellow in the middle, and then to orange and red on the right. The label 'Epiblast' is positioned on the left side, over the green and yellow regions. The label 'NE' is positioned on the right side, over the orange and red regions. There are several red dots concentrated in the orange/red area on the right. A few isolated green dots are visible below the main cloud.
