

**Early**

The diagram illustrates a developmental trajectory using a series of red dots. The dots are arranged in a curved path that starts at the top left, curves downwards and to the right, and then continues as a dense cloud of dots. The word 'Early' is positioned at the beginning of the path, and 'Late Mesenchyme' is positioned at the end of the path. The dots are colored in a gradient from light red to dark red, with the darkest red dots forming the main body of the path.

**Late  
Mesenchyme**
