

**Epiblast**

The figure is a scatter plot with a light gray shaded background. It contains numerous circular data points. The points are colored in a gradient: light blue for points on the left, transitioning through medium blue to dark blue for points on the right. The dark blue points are concentrated in a dense cluster on the right side of the plot. The label 'Epiblast' is located on the left side, and 'NE' is located on the right side, near the dense cluster of dark blue points.

**NE**
