

Epiblast

The image displays a scatter plot of data points within a light gray, irregularly shaped boundary. The points are colored in shades of blue and white. The label 'Epiblast' is located on the left side of the main cluster, and 'NE' is located on the right side. The points are more densely packed on the right side, particularly in the 'NE' region, where they are predominantly dark blue. The left side, labeled 'Epiblast', contains a mix of light blue and white points.
