

**Epiblast**

A scatter plot visualization showing two distinct clusters of data points. The left cluster, labeled 'Epiblast', consists of light blue and white semi-transparent circles. The right cluster, labeled 'NE', consists of dark blue semi-transparent circles. The points are distributed in a horizontal, elongated shape, with the 'Epiblast' cluster on the left and the 'NE' cluster on the right. A light gray, irregular background shape encompasses the main distribution of points.

**NE**
